1. INTRODUCTION

1.1 Overview

Uber is a multinational transportation network company that operates a ride-hailing platform.

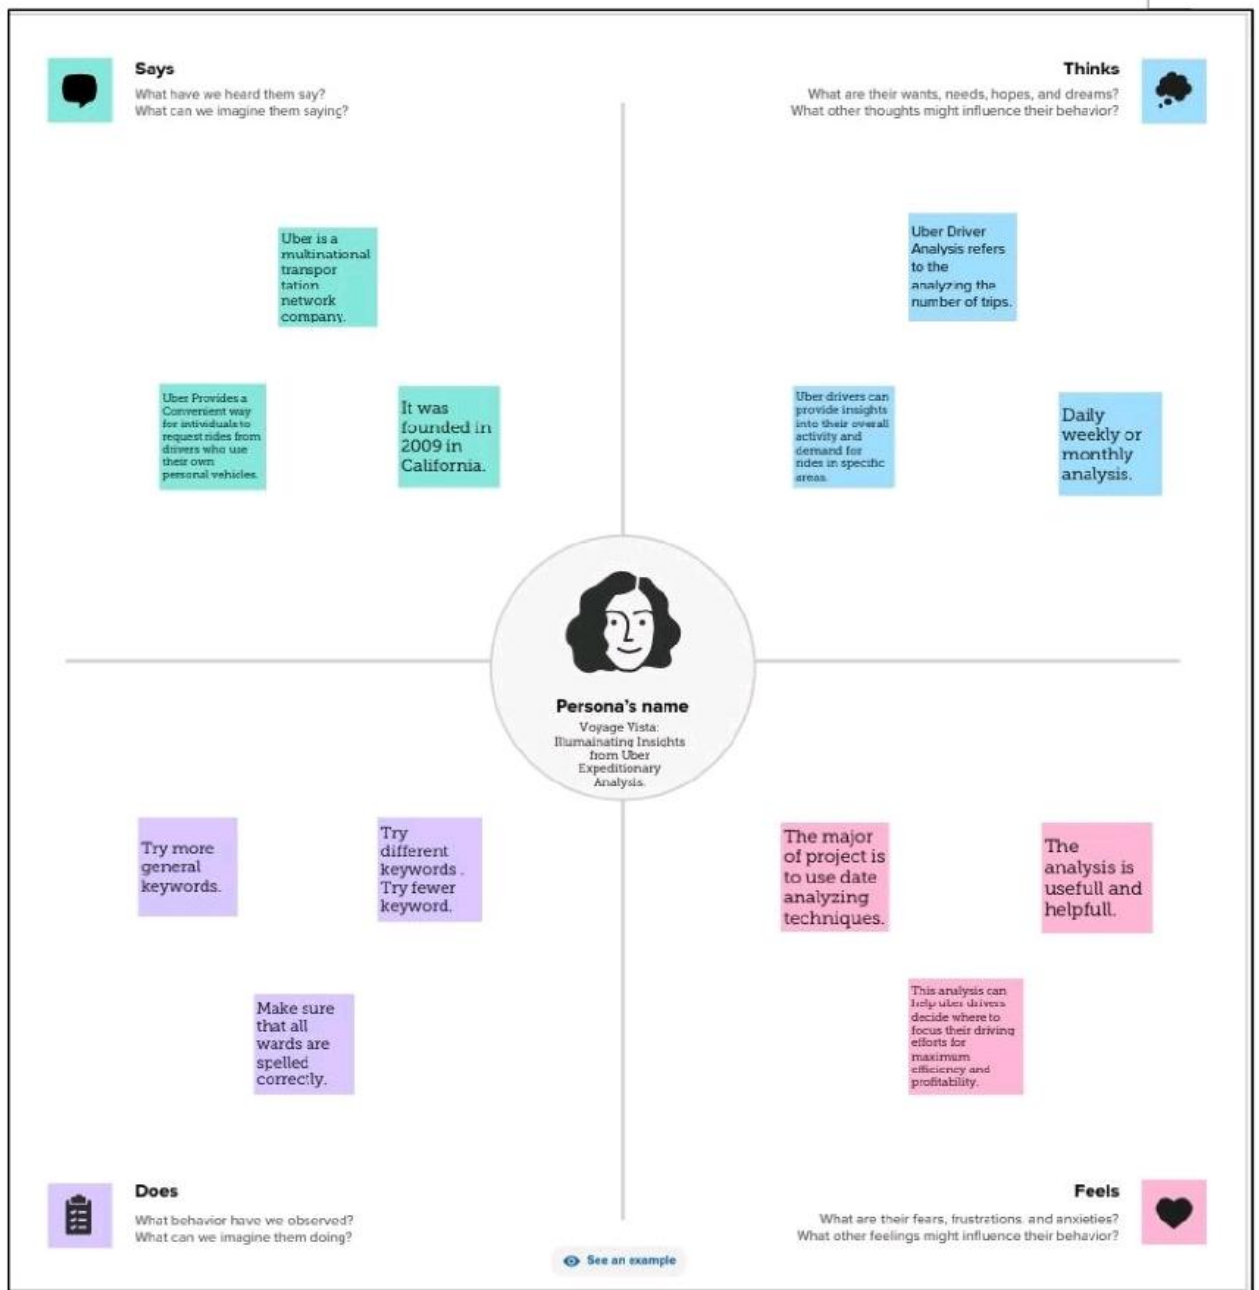

It was founded in 2009 by garrett camp and travis kalanick and is based in san francisco, california.

1.2 Purpose

Uber driver analysis refers to the analyzing the number of trips taken by uber drivers can provide insights into their overall activity and the demand for rides in specific areas.

2. PROBLEM DEFINATION & DESING THINKING

2.1 Empathy Map

2.2 Ideation & Brainstorming Map

ADVANTAGES

Daily, weekly or monthly analysis ; users data can be analyzed on a daily, weekly, monthly basis to understand the trends and patterns of trip volumes.

DISADVANTAGES

This analysis can help identify peak hours or days of high demand and optimize driver availability during those times.

Trips can be analyzed based on geographic regions or specific cities to identify areas with higher demand.

APPLICATIONS

The analysis can help uber drivers decide where to focus their derving efforts for maximum efficiency and profitability.

CONCLUSION

The major of our project is to use data analyzing pechniques to find unknown patterns in the uber drivs dataset.

The research is carried out on uber drives collected from the year 2016.

FUTURE SCOPE

- * Tableau
- * Data literacy
- *Data analysis
- * Data preparation
- * Business intelligence
- * Data visualization.
